Starting Ragas evaluation...
Evaluator model: gwen2.5:3b
RAG generation model: llama3.2:3b
Ragas max_workers=1
Evaluating: 100% | 40/40 [22:08<00:00, 33.22s/it]

OPTIMIZED RESULTS:
{'faithfulness': 0.6333, 'answer_relevancy': 0.4756, 'context_precision': 0.9500, 'context_recall': 0.9000}

=====
BASELINE VS OPTIMIZED
=====

Baseline:
{'faithfulness': 0.4889, 'answer_relevancy': 0.4325, 'context_precision': 0.9000, 'context_recall': 0.9000}

Optimized:
{'faithfulness': 0.6333, 'answer_relevancy': 0.4756, 'context_precision': 0.9500, 'context_recall': 0.9000}

Optimization Summary:
Baseline retrieval k = 1
Optimized retrieval k = 3
Changed variable = retrieval k
Chunk size = 100 for both configurations

Results saved to evaluation_output.txt

RAG Evaluation completed successfully.
